Исчисляемые и неисчисляемые существительные: покупки по-английски

Original student practice

В How many eggs? ребёнок считает яйца поштучно. В How much rice? речь идёт о количестве риса, а для счёта отдельно взятых порций пригодится, например, two bowls of rice. В 20 упражнениях эти различия встречаются в заказах, покупках и описаниях продуктов.

many / a few / a little

20. There are ___ carrots left: three in the bag.

a little / much / a few

Ответы и комментарии преподавателю

1. an apple. An apple is one whole countable fruit; milk and rice are treated as quantities here.

2. some. Rice is uncountable in this ordinary quantity meaning; some fits.

3. sandwiches. Two calls for the plural countable form sandwiches.

4. much. Milk is an uncountable liquid here, so ask how much.

5. many. Eggs are separate countable items, so ask how many.

6. bottle. A bottle can contain water; slice and loaf do not fit this container phrase.

7. slice. Slice identifies one cut portion of bread.

8. jar. Jam is commonly supplied in a jar in this shopping context.

9. loaf. A loaf is a whole shaped unit of bread.

10. some cheese. Cheese is a quantity here; a slice makes a separate countable unit.

11. any. Any fits this negative sentence with the plural bananas.

12. any. Any fits the question about an unspecified quantity of juice.

13. some. Some is natural in an offer; tea is uncountable in this wording.

14. Bottles. The container bottles is countable while water names its contents.

15. A serving is being counted. Context allows a drink name to refer to countable servings.

16. How many oranges are there? Whole oranges are plural countable items, so many and are fit.

17. a bag of sugar. The bag is the countable unit; sugar names the contents.

18. some. Some bread gives a quantity; an egg gives one countable item.

19. a little. A little modifies uncountable water; a few needs a plural countable noun.

20. a few. A few modifies plural countable carrots; the number confirms the meaning.
